Additional Info	must wait 4 hours before drinking water	must wait 4 hours before drinking water	extremely concentrated - use chlorine w/ test strips	Uses Fuel	wait 30 min. - slight chlorine odor or repeat

* Brown water will not clear up unless filtered. Purifiers will make brown water safe to drink but will not filter it to clear water.

** Kills bacteria and virus in approx 30 minutes. Needs approx 4 hours to kill protozoa. Great companion with the Frontier Pro Filter that immediately filters out protozoa.

^ The life of a filter depends on the quality of the source water. Pre-filtering (w/ a water sock, etc.) will pre-elong the life of your water filter.
